

a cubist thing

Follow the Instructions:

1. Make a list of three things (example: teapot):
_____, _____, _____.
2. Pick the item that has the most "parts" to draw. For example, a teapot is a good option because when you isolate the parts you have a pouring spout, a handle, the body, some water, a tea bag....
3. Now draw the parts one by one, turning your paper around 45 degrees between part. Then, turn your paper in all directions and find the orientation that you like the best. Then add whatever is needed to "finish" your thing.

It will be
weird probably:

4. Finally, try re-drawing your item in two different ways, using the above drawing for inspiration.
